Water and Sanitation Hygiene

CASE FOR SUPPORT

Together
WE ARE

**SERVING.
HEALING.
EMPOWERING.**

A Drop of Hope in a World of Thirst

Imagine walking miles every day just to find water that might make you sick. Imagine your daughter missing school because there's no safe, private place for her basic needs. Imagine watching your child suffer from diseases that could be prevented with something as simple as clean water and soap.

**For 2.2 billion people
worldwide, this isn't
imagination—it's reality**

What We Do: Transforming Lives, One Drop at a Time

The Helping Hand for Relief and Development (HHRD) Water and Sanitation Hygiene (WASH) Program is a comprehensive global initiative that brings life's most essential resource to those who need it most. From the refugee camps of Gaza to the remote villages of Afghanistan, from the drought-stricken regions of Africa to the flood-prone areas of Bangladesh, our WASH program operates across 21 countries, delivering hope through:

- **Clean Water Solutions:** From simple hand pumps to sophisticated filtration plants
- **Sanitation Facilities:** Washrooms and toilets that restore dignity and prevent disease
- **Hygiene Education:** Kits and training that empower communities to stay healthy

Why This Program Exists: Addressing a Global Crisis

Water is life. Yet every day:

- **829,000 people** die from diseases linked to unsafe water and poor sanitation
- **Women and girls** spend 200 million hours daily collecting water instead of attending school or work
- **1 in 4 schools** worldwide lack basic drinking water services

The WASH crisis isn't just about water—it's about human dignity, gender equality, education, and survival.

HHRD's WASH Program was established because we believe that access to clean water and sanitation is not a privilege—it's a human right. In emergency situations like the devastation in Afghanistan, natural disasters, or chronic poverty, this program provides immediate relief while building sustainable, long-term solutions.

Our Unique Approach: Innovation Meets Compassion

What sets HHRD's WASH Program apart is our commitment to comprehensive, culturally-sensitive, and sustainable solutions:

Technological Innovation

- Our Reverse Osmosis plants don't just clean water—they preserve essential minerals for health
- Solar-powered systems provide sustainable solutions in remote areas without electricity
- Rainwater harvesting transforms natural resources into community assets

Cultural Sensitivity

- Projects are designed with Islamic values and local customs in mind
- Gender-specific facilities ensure dignity and safety for women and girls
- Community partnerships ensure projects meet actual needs, not assumed ones

Holistic Impact

- Emergency Response: Water trucking and portable toilets for crisis situations
- Infrastructure Development: Mega boreholes and filtration plants for long-term solutions
- Education Integration: School washrooms that keep children—especially girls—in classrooms
- Health Prevention: Hygiene kits that prevent waterborne diseases

Global Reach, Local Impact

Our 2025 catalog showcases projects across diverse regions, each tailored to specific needs:

- **ASEAN Countries:** Building community infrastructure in Cambodia, Indonesia, and Laos
- **Palestine/Gaza:** Emergency sanitation solutions amid crisis
- **Afghanistan:** Sustainable water systems in challenging terrain
- **Africa:** Comprehensive solutions from emergency trucking to mega-projects
- **MENA Region:** Supporting refugees and displaced populations
- **South Asia:** Serving Rohingya refugees and rural communities in Bangladesh, Pakistan, and Nepal

The Numbers Speak: Impact That Matters

In our current portfolio alone, HHRD's WASH Program:

- **Serves over 150,000 beneficiaries** through various water projects
- **Provides emergency water** to 2,000+ people in Gaza through trucking
- **Supports 30,000 people** through mega-infrastructure projects in Africa
- **Serves 10,000 Rohingya refugees** with clean water solutions
- **Benefits 15,000 school children** with proper sanitation facilities

Why Your Support Matters Now

Immediate Impact

- **\$400** provides emergency water trucking for 1,500 people
- **\$1,600** builds a water tank serving 300 people for years
- **\$200** equips 150 families with hygiene supplies

Long-term Transformation

- **\$115,000** creates a mega borehole serving 30,000 people
- **\$160,000** establishes a water filtration plant benefiting entire communities
- **\$22,000** installs a solar-powered system providing sustainable water access

Crisis Response

In Gaza, where water infrastructure has been devastated, your support provides:

- Portable washrooms restoring dignity in desperate conditions
- Emergency water delivery sustaining life when systems fail
- Rapid sanitation solutions preventing disease outbreaks

Aligned with Our Greater Mission

The WASH Program embodies HHRD's core commitment to "serve humanity by integrating resources for people in need." It directly supports:

- **Emergency Relief:** Immediate response to water crises
- **Sustainable Development:** Long-term infrastructure building
- **Community Empowerment:** Local partnerships and maintenance training
- **Faith-Based Service:** Projects designed with Islamic values and universal human dignity

As part of HHRD's global network—partnered with organizations like WHO, WFP, and DFID—the WASH Program leverages international expertise while maintaining grassroots connection to communities in need.

Your Partnership Changes Everything

When you support HHRD's WASH Program, you're not just funding infrastructure—you're:

- **Saving Lives:** Preventing waterborne diseases that kill thousands daily
- **Empowering Women:** Freeing women and girls from water collection to pursue education and opportunity
- **Building Futures:** Ensuring children can attend school with dignity and health
- **Creating Sustainability:** Installing systems that serve communities for decades
- **Responding to Crises:** Providing immediate relief when disasters strike

The Ripple Effect of Clean Water

Every dollar invested in water and sanitation generates \$4 in economic returns. But the true impact goes beyond economics:

- A girl who can attend school because of a school washroom
- A mother who doesn't lose her child to preventable disease
- A community that thrives instead of merely survives
- A future where water scarcity doesn't determine human potential

Join Us in This Life-Changing Mission

The woman in Gaza who can maintain her dignity despite unimaginable circumstances. The child in Afghanistan who drinks clean water for the first time. The student in Africa who doesn't miss school because of inadequate facilities. The refugee family that finds hope in humanity's compassion.

These are the faces of impact. These are the lives you change.

HHRD's WASH Program isn't just about water—it's about recognizing the inherent dignity of every human being and acting on the belief that everyone deserves life's most basic necessities.

Will you join us in bringing hope, one drop at a time?
